ENGLISH
HINDI

PROFILE

As a responsible and orderly computer science student, I am eagerly seeking my first work experience I am enthusiastic about applying my skills, contributing effectively to projects, and gaining valuable professional experience in a collaborative work environment.

PROJECT

AUDIO TO SIGN LANGUAGE

Introducing an innovative Audio to Sign Language Tool, designed to break down communication barriers for the deaf or hard of hearing. This web-based platform seamlessly converts spoken language into sign language animations using advanced technologies like NLP, speech recognition, and 3D animation tools such as Blender. With a user-friendly interface, individuals can input audio, instantly view sign language animations, and provide feedback, fostering greater understanding and engagement. This project represents a significant step towards promoting communication accessibility and inclusivity for those with hearing impairments, utilizing technology to make a meaningful impact.
